

RESUME BRIEF

Mike Compton is the Chief Technology Officer (CTO) of ECS-Certifications, bringing over 25 years of expertise in cybersecurity, compliance, and certification standards. With a strong background in information security, IoT protection, and regulatory frameworks, he leads the development of cutting-edge certification solutions that ensure businesses meet global cybersecurity and compliance standards.

Throughout his career, Mike has been instrumental in implementing ISO/IEC 27001, IEC 62443, NIST 8259, and other cybersecurity standards, helping organizations safeguard their digital infrastructure. His leadership at ECS-Certifications focuses on innovation, risk management, and enhancing trust in certified security solutions.

As a recognized industry expert, Mike is committed to driving excellence in cybersecurity certification, enabling businesses to achieve regulatory compliance and operational security in an ever-evolving digital landscape.
